Patient Acknowledgement, Authorization for Assignment of Benefits (PA/AOB) and Proof of Delivery Acknowledgement:

I, _____ (patient name) acknowledge receipt of the item(s) noted above in the "Prescription and Items Received" section. I request that payment of authorized insurance be made on my behalf to Medical Express, PSI or an affiliate of Medical Express, PSI ("the provider") for products & services that they provide to me. I further authorize a copy of this agreement to be used in place of the original to release to payers any information needed to determine these benefits or compliance with current healthcare standards. I consent for the provider to use my Protected Health Information in all activities related to seeking insurance payment for the equipment and/or supplies I received. The provider bills third party payers as a courtesy; I understand that I am fully responsible for all deductibles, co-insurance and insurance allowables. I understand company business hours & that the provider representative will be contacting me regarding my financial responsibilities related to this agreement. I expressly consent to receiving auto-dialed and/or pre-recorded messages, emails, text messages or other electronic communication from the provider for any reason by using any telephone number, email address, and/or mailing address associated with my account. Additionally, I acknowledge receiving instruction, have demonstrated or verbalized my understanding in the proper use and care of the equipment or supplies described on this document and will follow them. **I understand that the provider is under regulation set forth by Medicare, state licensing boards, and accrediting organizations. Therefore, products are under limited warranty and are non-returnable except in the event of a defective or improperly fit product** *(rental items are returned after the rental period unless defective and needs replacement).* I acknowledge receipt & understand the company patient information privacy notice provided to me and that all information on this document is correct. I further agree to all terms and conditions on the back of this form. The products and/or services provided to you by the provider are subject to the supplier standards contained in the Federal regulations shown at 42 Code of Federal Regulations Section 424.57(c). These standards concern business professional and operational matters (e.g., honoring warranties and hours of operation). The full text of these standards can be obtained at http://ecfr.gpoaccess.gov. Upon request we will furnish you a written copy of these standards.

Office Visit 5/7/2025
Orthopaedic Surgery Clinic

Provider: Skiles, Steven Leo, PA-C (PA: Orthopaedic Surgery (20))
Primary diagnosis: Closed nondisplaced fracture of fifth metatarsal bone of left foot, initial encounter
Reason for Visit: Referred by Rao, Seema Mahale, MD

Progress Notes

Skiles, Steven Leo, PA-C (Physician Assistant) • PA: Orthopaedic Surgery (20)

INITIAL VISIT. 5/7/2025

HISTORY OF PRESENT ILLNESS:
Sharron Schumann is a 79-year-old female who was referred to us from primary care provider for evaluation of her left foot. She states that approximately 3 to 4 weeks ago she was walking up steps when she tripped and noted immediate pain in her lateral portion of her left foot. She has been fully weightbearing and has been noting continued pain and swelling in her left foot. She currently supplements with over-the-counter Advil which mildly seem to help her with her pain symptoms. She has a history of lumbar sacral disc disease as well as type 1 diabetes mellitus. She also has a history of hyperparathyroidism and Hashimoto's disease.

PAST MEDICAL HISTORY:
Past Medical History:

Diagnosis	Date
• Anxiety disorder	
• Bulging lumbar disc	
• Coronary artery disease	
• Depressive illness	
• Hashimoto's disease	
• High cholesterol	
• Hyperparathyroidism (*)	
• Hypothyroid	2011
• Microscopic colitis	
• Osteoporosis	
• Seasonal allergies	
• Single kidney *only have right kidney & the left was removed at infancy due to congenital defect.*	
• Type I diabetes mellitus (*)	

PROBLEM LIST:
Patient Active Problem List
Diagnosis
- Neoplasm of uncertain behavior of skin
- Lichenification and lichen simplex chronicus
- Hypothyroidism
- Long term (current) use of insulin (*)
- Osteoporosis
- S/P subtotal parathyroidectomy
- Type 1 diabetes mellitus with hyperglycemia (*)
- Vitamin D deficiency
- Colitis, collagenous
- Depression
- GAD (generalized anxiety disorder)
- Chronic coronary artery disease
- Back Pain - Spine Registry
- Neurogenic claudication
- Neck Pain - Spine Registry
- Spinal stenosis of lumbar region without neurogenic claudication
- Hypermetropia, bilateral
- Presbyopia
- Regular astigmatism of both eyes
- Type 1 diabetes mellitus without complication (*)
- Posterior vitreous detachment of both eyes

- Posterior capsular opacification non visually significant, left
- Pseudophakia, both eyes

PAST SURGICAL HISTORY:

Past Surgical History:

Procedure	Laterality	Date
• APPENDECTOMY		
• CARDIAC CATHETERIZATION		
• COLONOSCOPY		2015
• COLONOSCOPY *Performed by Mithani, Rozina, MD at OUTPATIENT SURGERY CENTER*	N/A	02/28/2019
• EGD *Performed by Mithani, Rozina, MD at OUTPATIENT SURGERY CENTER*	N/A	02/28/2019
• KIDNEY/BLADDER SURGERY *left nephrectomy*		
• PARATHYROIDECTOMY	Left	02/2012
• TONSILLECTOMY

• TRANSFORAMINAL INJECTION *Performed by Chew, Ivan, MD at OUTPATIENT SURGERY CENTER*	Right	4/2/2025

SOCIAL HISTORY: reports that she has never smoked. She has never used smokeless tobacco. She reports current alcohol use. She reports that she does not use drugs.

MEDICATIONS: has a current medication list which includes the following prescription(s): ketone urine test, azelastine, blood sugar diagnostic test, dexcom g6 transmitter, dexcom g7 sensor, budesonide ec, bupropion xl, vitamin d, clobetasol, duloxetine delayed release, gvoke hypopen 1-pack, ibandronate, insulin glargine, lantus u-100 insulin, insulin lispro, insulin lispro, lyumjev kwikpen u-100 insulin, insulin needles (disposable), ketoconazole, lancets, levocetirizine, levothyroxine, loperamide, loperamide, mecobalamin, multivitamin, fish oil/borage/flax/om3,6,9 1, rosuvastatin, triamcinolone, urea, and valacyclovir.

ALLERGIES: Meloxicam, Penicillins, and Sulfa (Sulfonamide Antibiotics)

REVIEW OF SYSTEMS: The patient denies any recent history of fevers, chills, or other constitutional symptoms. Past medical, surgical, and social history per electronic medical record were reviewed.

PHYSICAL EXAMINATION:
not currently breastfeeding. There is no height or weight on file to calculate BMI.
in no apparent distress and well developed and well nourished
Patient is able ambulate in the office today without specific gait abnormalities. Inspection of her left foot shows no evidence of erythema, induration, or appreciable edema. Tenderness to palpation is noted over the midshaft of the fifth metatarsal with a palpable defect. Crepitus is noted. She has no other forefoot, midfoot, or hindfoot pain. She has an intact EHL/FHL as a move her lesser toes. Her distal sensory function is intact utilizing monofilament. 2+ dorsalis pedis pulse. Her skin is clean, dry, and intact without lesions.

IMAGING STUDIES:
Plain films of her left foot that were obtained on 5/2/2025 per radiology read;
Subacute mildly displaced and comminuted fracture of the fifth metatarsal shaft.
Severe diffuse demineralization limiting evaluation of nondisplaced fractures and infiltrative processes.
Mild scattered degenerative changes.

LABORATORY STUDIES:
CBC with Differential:

IMPRESSION:
Nondisplaced left fifth midshaft fracture of the metatarsal.

PLAN:
Exam findings and plain films reviewed with her. At this time we will place her in a dynamic walking boot and she was provided an even up for her contralateral side. She was instructed to remain nonweightbearing at this point in time. I will follow-up with her in approximately 4 weeks with repeat x-rays to closely monitor her progress. She may continue with the over-the-counter Advil. She was also instructed on icing and elevation. All of her questions were invited and answered fully. She is in agreement with this treatment plan.

Greater than 45 minutes was spent with the patient today on pre-visit planning, reviewing medical history, imaging, laboratory results, face-to-face encounter, education, referrals/care coordination, and documentation of today's visit.

Steven Skiles, MPAS, PA-C
